Products from WAGNER Industrial Solutions stand for maximum reliability, quality for your specific requirements.

Furniture, walls, garden fences, construction machines, mobile phones, wheel rims, leather sofas, or perfume bottles - there is hardly any object that does not come with a coating. The reason is obvious: among others, the surface determines the function, durability and the attractiveness of an object.

Join us in the world of perfect surfaces. Our know-how makes WAGNER one of the world's leading manufacturers of devices and system for surface coating. Be inspired and rest assured that you will find the best solution for you here.

WAGNER

We accept challenges.

WAGNER Industrial Solutions offers devices, equipment, and systems for all industrial surface coating applications. Our innovative products and solutions stand out due to their quality, efficiency and productivity.

As a market leading manufacturer of high tech systems, we offer components for the application of liquid and powder lacquers and paints to surfaces. As one of the few providers in this market we offer a complete product and technology range for the complete process sequence, starting with feeding the product, followed by mixing, moving and controlling to finishing the optimal application to the surface. Efficient use of resources, maximum quality and cost-effectiveness is our maxim - in every case!

WAGNER Development center

The modernly equipped WAGNER Development Center sets new standards for the development of products and solutions for the surface coating industry - be it for the first idea or the series production start. The WAGNER Development Center also ensures compliance with all national and international standards and regulation as part of the product development.

WAGNER Technology center

At our Markdorf site, WAGNER has a unique technology center with a floor space of more than 1,400 m² for liquid and powder coating. As well as using the center for our own product development and for training purposes, it is also available to product manufacturers and coaters, for them to work with WAGNER to develop process parameters and system configurations for optimum coating results.

WAGNER Service

Always near you - the WAGNER service network. WAGNER offers its customers a global service. At our locations you will always find the right contact person with an answer to all technical questions. We recommend regularly undertaking preventative checks and maintenance on your system. Various qualified and certified services (e.g. maintenance contracts, operational reliability checks) are available for this purpose.

WAGNER Distribution support

WAGNER has a large network of qualified distributors around the world. Depending on their specialization, they provide not just components and spare parts but also solutions and various user advice services. For information about your nearest WAGNER dealer, please visit our website <http://www.wagner-group.com/en/service/service-for-industry/wagner-service-partners/>

Are you interested in becoming an agent for WAGNER industrial products? We can offer you comprehensive support with a wide range of services to assist you:

- Extensive training, providing information on applications, products, and services in the WAGNER Academy
- Marketing support for trade fairs, events, and your media presence
- Technical advice to help you design optimum solutions
- Competent service to support products during use
- Web-based dealer information and the WAGNER dealer shop
- Friendly customer service for special orders and developments

AirSpray manual and automatic guns

WALTHER PILOT spray guns can process virtually all coating materials. These not only include water and solvent based lacquers, but also adhesives, separating agents, oils and more. All models offer an extensive nozzle selection to meet the highest quality requirements and ensure material-saving processes. Additionally, most of the spray guns are also available as medium-pressure and HVLP Plus models. This allows for particularly high application rates. Put us to the test and use the successful results as benchmark: The spraying results, the material savings, and the sustained contribution to environmental protection thanks to the reduced use of overspray.

Low-pressure finishing diaphragm pumps

The first choice for supreme coating quality. The Zip 52 Finishing is reliable, powerful, and ideally suitable for use with automatic and manual spray guns. For use in electrostatic systems, HVLP or fully conventional air atomization applications that apply coatings to wood, metal, synthetic material, glass or leather. The Zip Finishing Spraypacks contain either the patented WAGNER Fine Flow Controller (FFC), which combines a precision material pressure regulator, an anti-pulsation unit and a material filter in a single device or a large volume anti-pulsation filter as a cost-effective entry level version.

Zip Eco Perfect Flow + PILOT Trend

Low-pressure diaphragm pump

Zip Eco PF incl. PILOT Trend	Art.-No.	Price in €	PH 2
Spraypack ZIP-Trend	2348512	-	-
Includes:			
Pump Zip EcoPF			
Airspray gun PILOT Trend 1,2mm			
LP Hose package 7,5m			

Low pulsation, perfect for application of primer, glue, 2-K, product incompatible with fluid regulator.

Zip 52 Finishing + PILOT Premium

AirCoat manual guns

WAGNER AirCoat combines Airless and air atomizing spraying technologies. It not only delivers an excellent coating quality using significantly less spray pressure than Airless and significantly less overspray than the AirSpray procedure, but is also a lot faster. WAGNER AirCoat manual and automatic guns offer not only ease of use, ergonomics, and low maintenance, but also precision, and a long service life.

Finishing piston pumps

With the IceBreaker finishing piston pumps, WAGNER covers the entire spectrum of industrial applications. Whether window manufacturer or automated multiple gun application in the furniture industry, low viscosity glaze or high-viscosity high-solid lacquers: The product range fulfills all possible requirements. The pumps are highly energy efficient and durable. The air motors work without icing and thanks to their very low pulsation, always produce optimal spraying results. The air motors work without icing and thanks to their very low pulsation, always produce optimal spraying results.

Automatic guns for wood finishing

The WAGNER and Walther automatic guns provide a softer and smoother spray pattern. This leads to a homogeneous spray pattern with simultaneously high application efficiency. The guns have a small and lightweight design. This allows for more flexibility during installation and the lowest possible accelerated mass with quick movement sequences. The base plate system maintains all settings and the exact position during nozzle and gun changes. This allows reproducible coating results. Various base plates and adapters allow the integration into all current coating systems.

WAGNER Electrostatic & 2-K systems

WAGNER electrostatic guns as well as special systems for the application of water-based products. These guns offer the same benefits as those for solvent-based products. However, the guns for water-based products offer no integrated high-voltage cascade. One special feature is the WAGNER AquaCoat system. It allows diverse options for the electrostatic application of water-based lacquers. Excellent wrap-around and low overspray usage ensure not only the best coating quality, but also impressive material and time savings. With its mixing and dosing units, WAGNER offers a powerful family of products that fulfills the various requirements of numerous industrial applications perfectly. Whether mechanical or electronic, low or high pressure, automatic or manual coating - with the various WAGNER systems 2K to 4K materials can be processed to fulfill customer specific requirements.
