RUPES

Realizzazione Utensili Pneumatici Elettrici Speciali, since 1947

Our history is composed of achievements, challenges, ideas, and international successes. The constant commitment to research and development, aimed at constantly improving the performance of each product, is one of the fundamental aspects that during our 78 years of history have contributed to affirm RUPES as one of the major successful brands in the field of professional tools.

The focus on designing and manufacturing products that are in total compliance with health and safety regulations, offering enhanced worker comfort, and providing innovative solutions are at the core of each new idea.

With five production facilities in Italy near Milan and two in the United States—located in Louisville, Colorado, and Houston, Texas—RUPES maintains a strong global presence. Backed by a well-established sales network, RUPES stays close to its customers, delivering innovative products that anticipate and responds quickly to market needs. The brand has complete coverage of all the main international markets, bringing its systems all over the world thanks to a distribution network consisting of two direct branches and numerous authorized dealers.

MISSION & VISION

Designing, manufacturing and distributing innovative and reliable solutions in the professional tool market, with particular emphasis on electric tools, pneumatic tools, low voltage tools, and dust extraction systems to improve the quality of life and work.

Researching and creating solutions to simplify work and increase performance, enhancing both productivity and worker comfort while increasing safety. We design tools that change the way people work, helping professionals to work better, faster, and more effectively.

Improving work quality and simplifying tasks through creativity and innovation is our primary skill. We know that the satisfaction of a job well done is something less.

We work hard allowing you to work better. Passion for what we do, on - going research through leading - edge technologies, and commitment to our customers demands are the inspirations that show us the way towards the future.

FOCUS

Q-MAG
MAGNETIC TECHNOLOGY

Q-MAG magnetic technology

A completely new and innovative concept by RUPES introduces a revolutionary solution for the sanding of all painted surfaces, wood, plaster composite materials, and more.

The Q-MAG iBrid Nano provides reliability and comfort and ease of operation for any process where spot, isolated, or edgework sanding is required.

The revolutionary new Q-MAG technology featured on the Q-MAG iBrid Nano allows for quick changes of the backing pad using a proprietary magnetic engagement system.

The backing pad can be removed or repositioned easily by hand without the need for any additional complicated tool processes.

Ease of use, time savings, and maximum safety make Q-MAG technology a new frontier in the field of professional sanding and polishing tools.

NEW BACKING PADS PRECISIONPRO

These revolutionary backing pads have been meticulously designed to take your polishing experience to the next level. Without polyurethane, they not only bring durability to the forefront but also provide a lower center of gravity. This means enhanced stability during operation, allowing for greater control and precision in your work.

The rubber edge adds an extra layer of finesse to your polishing tasks, ensuring that even the most delicate surfaces are treated with care.

What truly sets our backing pads apart is their ability to guarantee better balancing, even with different polishing pads. This means you can effortlessly switch between various pads without compromising on performance or quality.

LOWER CENTER OF GRAVITY

For superior stability and control

RUBBER BORDER PROTECTION

For added surface protection and a smoother glide

BALANCING VERSATILITY

Perfect balance with various polishing pads

D-A series - Foam polishing pads

- The D-A Foam Pads feature advanced materials and a redesigned contoured profile, ensuring compatibility with BigFoot random orbital and gear-driven tools.
- The lower profile maximizes the transmission of tool movements to the surface, improving stability, control, and user experience during polishing.
- The contoured profile allows for easier polishing of complex and hard-to-reach areas, reducing the risk of accidental contact with the backing pad

Foam pads for rotary polishers

- Waffle Pads are designed for use with the BigFoot LH19E and other rotary polishers, ideal when paired with Rotary Compounds.
- The waffle-shaped surface enhances polishing comfort and ensures a smoother experience.
- By minimizing full contact with the surface, the waffle design helps maintain cooler operating temperatures, reducing the risk of paint overheating.

HQ400 FILM ABRASIVES

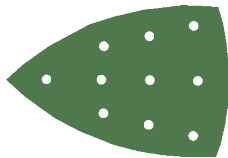

**ALL THAT YOU NEED
TO MAKE YOUR
OUTCOME PERFECT**

A full range of abrasives with perforated polyester film backing that ensure higher sanding efficiency and an extended life. Higher quality than paper thanks to the grain homogeneity and the even surface. Resistant to humidity, efficient even on wet surfaces with reinforced edges, it's long lasting without film damage.

Efficient on difficult to reach areas such as corners and sharp edges. No obstruction on the film due to the better vacuum system, multihole plates and central hole, removes up to 50% more dust than traditional paper abrasive film.

NIVEUS - Air purifiers

The perfect solution for excellent air purification

Android

Apple

The new NIVEUS Air Purifier is the perfect solution to achieve excellent air purification and create a healthy environment, increasing people's protection. Thanks to its compact size, this product can be easily installed in different rooms. The RUPES air purifier can cover an area of 120m² or a volume of 300m³.

This purification device improves indoor air quality by reducing and capturing micro-dust, allergens, bacteria and viruses with the aim of safeguarding the health of workers and general public.

People can be exposed to a variety of particulate matter and biological contaminants in congregations and workplaces that can lead to adverse health effects.

Pollution in these environments is defined by the presence of harmful visible and invisible particles such as micro-dust, bacteria, viruses, allergens, vapours and fumes.

Exposure to these microorganisms occurs through inhalation, direct contact and swallowing.

INSTALLATION SITES:

RUPES Niveus Air Purifier can cover several environments. This purifying product increases indoor air quality, reducing and capturing micro dust, allergens, bacteria and virus with the purpose of improving peoples' health. Thanks to its compact dimensions, can be easily installed in several sites.

KS300EP - KS300EPH

Professional mobile vacuum cleaners with work station

- Professional vacuum cleaner with integrated workstation, Dual Motor Technology (two 1200W brush motors each) and 5m² filter area with three filtration steps (KS300EPH version also includes a Hepa filter). Alternating motor activation, one motor can support up to two pneumatic and/or electric tools simultaneously.
- Patent: Long-life motor technology (motors run in alternating mode-double lifetime/life compared to single-motor vacuum cleaner)

KS300ECS - KS300ECHS

Professional mobile vacuum cleaners with work station

- Professional vacuum cleaner with integrated workstation, with 1100W brushless motor 5m² filter surface area with three steps of filtration (KS300ECHS version also includes a Hepa filter). Can support up to two pneumatic and/or electric tools simultaneously.
- Patent: Integrated workstation
- The vacuum cleaner is equipped with a new electronic touch screen display with customized dashboard that allows you to remotely monitor its operation, power, filter status, and schedule maintenance work. In addition, the vacuum cleaner can be connected via Wi-Fi for complete control of processes and workings with the innovative cloud portal to optimize time, reduce consumption, and improve reliability and efficiency.
