

Best finishing results with high transfer efficiency:
The manual airspray gun **WAGNER GM 1030P** provides
a precise spray pattern and is also extremely versatile.

The **WAGNER GM 1030P** enables high-quality surfaces with first-class components. It can be used for a variety of applications in many industries.

- Low overspray
- Easy & comfortable use
- Long service life

Excellent atomization

Large material and air passages of the components support perfect atomization and high application speed.

Long service life

Low maintenance costs and minimized downtime due to durable needles and solvent-resistant seals. Thanks to the two-part nozzle, it is sufficient to replace only the nozzle head instead of the complete nozzle, if necessary.

Easy & comfortable use

The spray jet width can be adjusted with just one rotary knob. The gun's low weight and ergonomic design support fatigue-free work even over long periods of time.

Optimized efficiency & process control

Once set, the air volume is automatically adjusted when the spray pattern is changed. This helps to reduce overspray. The fixable needle stroke adjustment ensures a constant material flow rate.

Flexible application

Thanks to the large stainless steel material passage, the GM 1030P is very versatile. It is perfectly suited for high and low viscosity materials, both water- and solvent-based.

Technical data

Features	Data
Air cap (atomization technology)	<ul style="list-style-type: none"> • Conventional (high pressure) • HVLP plus (reduced pressure) • HVLP
Nozzle size	Ø 0.3 - 3.5 mm (depending on application)
Wetted parts	Stainless steel
Material passage	Ø 9 mm
Air inlet	G 1/4"
Material inlet	G 3/8"
Air inlet pressure	Max. 8 bar (116 psi)
Material pressure	Max. 8 bar
Weight	486 g

Available spraypacks

Model	Options
TOPFINISH DD10 spraypack incl. manometer	<ul style="list-style-type: none"> • GM 1030P incl. accessories • Trolley, stand or wall bracket • Hose package (EPDM or polyamide) • Hopper or suction hose • Pump accessories (regulator, filter etc.)
Zip 52 spraypack aluminium or stainless steel incl. manometer & regulator	

Accessories

- 110° shaping air regulator set
- Material tube with filter (stainless steel)
- Swivel joint for air and material connection
- Hose packages

Processable material

- Stains
- Primers
- Fillers
- Base/top coat
- Clear coat
- Spray putties
- Release agents

Combination with low-pressure double diaphragm pump TOPFINISH DD10
